ABSTRACT

Chapter One

This is the introduction of the subject starting with the background of the study and its significance. It also outlines the objectives of the study, statement of the problem and the importance of the study, assumptions about the strikes and questions which are derived from the objectives of the industrial strikes.

Chapter Two

This is the core part of the study. It entails the meaning, classification, causes of strikes, how strikes can be prevented and also the outcome of industrial strikes in the working environment and employees' productivity.

Chapter Three

Chapter three outlines the research design which is the arrangement of conditions for collection of data. It also shows the target population of the scoopers and sampling procedure and data collecting instruments which is categorized into primary and secondary.

Chapter Four

Methodology describes the various methods that the researcher has used to collect the data of the study. It also presents the statistical data on the occurrence of industrial strikes.

It also includes interpretation of statistical data.

Chapter Five

This chapter includes the conclusion of the study and the various recommendations that the researcher feels would greatly assist in solving industrial strikes.
